ULTRARAVIS

ULTRARAVIS IS AN EPIC TALE OF WHAT MAKES A HOUSE
A HOME, AND HOW TO EXPERIENCE IT BY LIVING IN
THE PRESENT MOMENT.

words by Thibault Pollet Villard,
images by Mathis Dumas

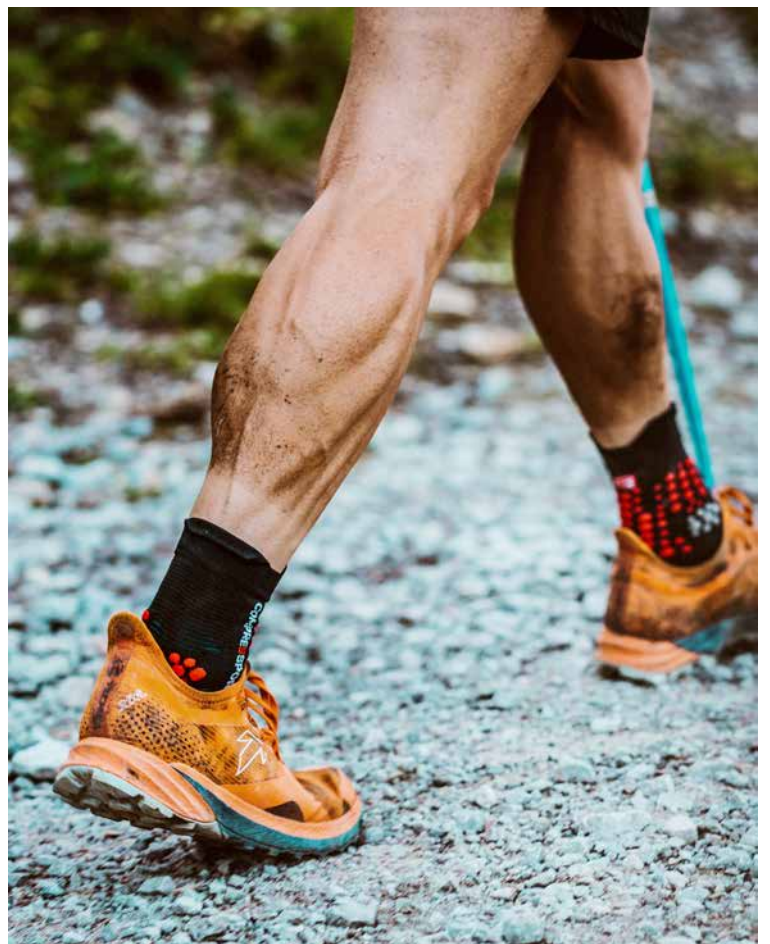

For Thibault Pollet Villard, a native of La Clusaz, in the Auvergne-Rhône-Alpes region in south-eastern France, it was more about the journey than the destination. When he left his home village on Saturday morning, August 15th, he had a story to tell.

The 110-km route crossed some of the most difficult and technical terrains, with a total elevation gain of 9500 m along the mountain ridges surrounding this unique basin.

“THIS IS QUITE A NATURAL ROUTE IF YOU KNOW THE ENVIRONMENT AROUND THE VILLAGE. THIS IS WHERE I TRAIN IN SUMMER AND WINTER ALIKE, AND IT MADE PERFECT SENSE TO LINK UP THESE STRETCHES OF SKYRUNNING-TYPE TERRAIN INTO A SINGLE PROJECT.”

The support along the way was made all the more special by the group of friends that came together to help Thibault achieve his dream.

“INITIALLY IT WAS A SURPRISE TO SEE SO MANY PEOPLE CONVERGING AROUND THIS PROJECT: LOCALS, BUT ALSO ATHLETES AND OTHER PEOPLE WHO SIMPLY FELT THE FASCINATION IN THIS CHALLENGE. I WAS VERY MOVED AND HAPPY TO BE AT THE CENTRE OF MY VILLAGE, AND TO FEEL SO WELL-SUPPORTED IN MY EPIC ADVENTURE.”

Not only was the chosen route beautiful, with incredible views, but the terrain was extremely difficult with landscapes that kept changing throughout.

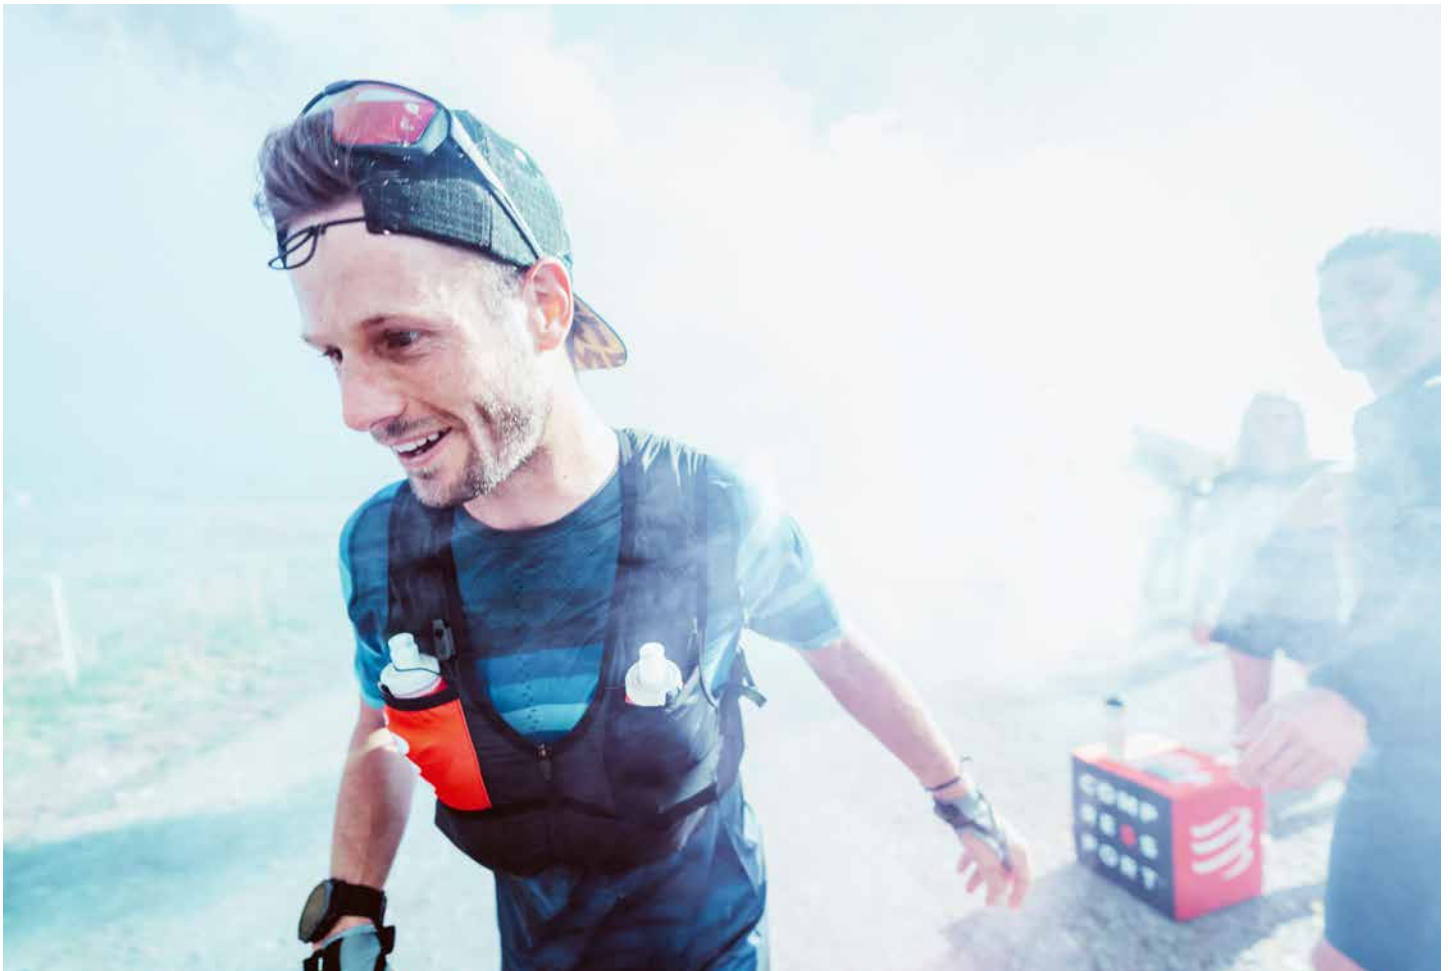

THE PRESENCE OF HIS FRIENDS AND THE PICTURESQUE MOUNTAINS OF HIS STOMPING GROUND MADE IT EASIER TO BEAR THE PHYSICAL EFFECTS OF THE LONG ADVENTURE AND THE HEAT.

•
•
•
•

“WHAT A JOY TO RUN, TO LAUGH TOGETHER. WE MEET PEOPLE WHO ENCOURAGE US.

A little challenge for the last kilometres, approaching 4 minutes per km. We enter La Clusaz where we hear Arnaud on the microphone. People have gathered in the square to welcome and congratulate us. An intense and moving moment that helped to close the circle. I owe a lot to my followers, my logistics team, my family and friends, and my coach, without whom none of this would have been possible."

ORIGIN LD

ORIGIN LD IS DESIGNED FOR TRAIL RUNNING TRAINING AND LONG-DISTANCE RACING. IT COMBINES RUNNING PRECISION WITH COMFORT AND PROTECTION IN A LIGHTWEIGHT SHOE.

- PERFECT INDIVIDUAL FIT
- COMFORTABLE RUNNING PRECISION
- SAFETY AND STABILITY
- SUPERB TRACTION ON VARIED TERRAIN

CAS

CUSTOM ADAPTIVE SHAPE

15

CUSTOMIZED
IN 15 MINUTES

PERFECT INDIVIDUAL FIT

GREAT FIT OUT OF THE BOX ANATOMICAL LAST

Running long distances on trails requires a superior level of comfort and secure foot hold. The Origin LD upper and footbed are pre-shaped around a specific anatomical last to deliver a great feel and perfect fit, right out of the box. This anatomical fit also provides greater midfoot support and heel hold while running.

CAS

CUSTOM ADAPTIVE SHAPE

NO BREAK-IN TIME

CUSTOM ADAPTIVE SHAPE

Each foot is unique. This is why we believe that footwear should deliver a specific and personalized fit. The option to customize our shoes dramatically reduces the time normally needed to break in a new pair of shoes and resolves the majority of foot problems.

Tecnica Origin are the only running shoes that can be thermo-molded according to the individual's foot shape.

CAS

CUSTOM ADAPTIVE SHAPE

MIDFOOT SUPPORT

C.A.S. FOOTBEDS

When muscles get tired during a long-distance race or training on trails, it's crucial to have a shoe capable of supporting the midfoot and accurately transferring information about rough terrain.

Thanks to C.A.S. technology, our footbeds and uppers can be thermo-molded around the heel and the foot arch to deliver a new level of running precision and minimize fatigue.

COMFORTABLE RUNNING PRECISION

KNITTED ENGINEERED GUIDANCE

Comfort and running precision are always at the top of trail runners' requirements.

Our signature KNITTED ENGINEERED GUIDANCE technology combines the comfort of a one-piece knitted upper with the secure foot hold offered by a lightweight engineered cage structure.

ENGINEERED GUIDANCE
FOOT HOLD

TPU REINFORCEMENTS
DURABILITY

KNITTED CONSTRUCTION
COMFORTABLE AND PRECISE WRAPPING FIT

MICRO ADJUSTMENT

INTEGRATED LACING SYSTEM

The laces are fully integrated into the knitted upper. Thanks to their clever design, the special gusset laces allows precise, secure micro wrap adjustments and prevents pressure points at the instep.

SAFETY AND STABILITY

TORSION CONTROL

ESS INSERT

When tiredness numbs the legs and muscles, stability and support is key. The Origin LD sole has a wide design featuring a V-Shaped ESS insert plate at the midfoot to deliver torsion support and help prevent ankle injuries.

SHOCK ABSORPTION

HIGH REBOUND EVA MIDSOLE

Rough, technical terrain presents the ultimate test for trail runners' shoes and legs, especially on downhill sections. The high rebound EVA compound midsole offers good elasticity and with a 21 mm / 27 mm stack height and 6 mm drop, providing outstanding cushioning and protection for long-distance running.

SUPERB TRACTION ON VARIED TERRAIN

TRACTION CONTROL

VIBRAM® MEGAGRIP™

Grip and stability are always a top trail running safety priority. That's why the Origin LD sole features Vibram® Megagrip™ compound and an exclusive lug design that guarantees multidirectional traction and safe downhill braking for greater safety, plus superior grip on both dry and wet terrain.

EXPLORE LOCAL, PROTECT GLOBAL

Words by Lorenzo Alesi and Alice Linari,
images by Samuele Cavicchi

A PROJECT TO FINALLY REDISCOVER IN A
SUSTAINABLE WAY THE WONDERFUL NATURE
A FEW STEPS AWAY FROM US.

The forced period of isolation, imposed by the health emergency, has temporarily prevented our journeys, however, almost triggering the need to return to the environment, to nature, to the mountains. As we gradually returned to normality, with regard to travel between regions and states, we thought that the concept of Explore Local, Protect Global was the right message to share: to return to live nature starting from the rediscovery of the beauty and places we have close to home, with the possibility of reconnecting to it, appreciating what we have without the need to make long journeys, rediscovering a new dimension of travel, respecting the territory and the sustainable choices to be adopted to protect both the environment and others.

WE THEREFORE DECIDED TO START OUR PROJECT STARTING FROM THE SIBILLINI MOUNTAINS, A MOUNTAIN RANGE BETWEEN MARCHE AND UMBRIA, A LAND OF LEGENDS AND MAGIC IN THE HEART OF CENTRAL ITALY.

The starting point of our adventure is Forca di Presta, one of the most evocative places in the area of the Umbrian-Marches Apennines, located at 1,550 m above sea level.

From this gallows we climb easily and quickly, the path is sometimes steep, sometimes embedded in the ground, sometimes with a rocky bottom, but offers on the one hand suggestive views of Castelluccio, on the other hand on what remains of the medieval villages unfortunately destroyed by the earthquake of 2016.

We reach the **crest of the Ciaule** and then continue and descend towards the **Lake of Pilate**, a place of magicians and necromancers, where the local tradition says that the cart pulled by oxen carrying the body of Pontius Pilate fell.

WE CONTINUE OUR JOURNEY AND THE LANDSCAPE BEGINS TO CHANGE.

We pass from the severe environment of the **Valle del Lago**, made of rocky ridges and scree, to the steep but grassy and full of flowers slopes that we cross heading towards the **Priora** and then towards Pizzo Berro.

The contrast between hard and rugged ridges, where the wind hisses continuously, and valleys with lush vegetation and water, finds its perfect fusion in the gorges of the **Infernaccio**: a narrow gorge that winds through high rocky spires, from Passo Cattivo to Monte Fortino, crossed by a torrent that flows at times impetuously between waterfalls and rocks, at times gentle almost without making noise.

The vegetation is incredibly green, the beech forests draw perfect lines, the mosses on the trunks of the trees look like a painting. Here the feeling is that everything is in order, in balance. However, even though one of the many landslides following the 2016 earthquake blocked the path of the stream creating a small lake, the area of **Infernaccio** (contrary to its name) infuses a sense of peace, quiet and deep connection with nature: a wonderful sight.

Pizzo Berro with the summit characterized by rocks that look like sharp blades is the last peak we decide to climb.

From here you can enjoy a crazy view of Monte Bove where you can admire the chamois, the Val di Panico, the Priora and looking south you can see the entire route we have done in recent days. Below are the **Infernaccio** gorges that we can admire from above and above them the Sibilla, the summit from which the whole mountain range takes its name.

We descend towards **Monte Rotondo** where the grass caressed by the wind, in contrast to the grazing light of the setting sun again, makes the landscape quite suggestive. After more than 40 kilometres on foot we reach the **Fargno** refuge satisfied, we take our e-bikes, turn on the front lights and go back towards Castelluccio.

THE RETURN JOURNEY THROUGH THE PLAIN OF CASTELLUCCIO IS A MUST: IT'S JUNE AND IT'S TIME FOR THE FAMOUS BLOSSOMING.

The expanse is like a painting of a thousand shades because the bands of different colors follow one another like large but delicate brushstrokes given on the surface of the earth: magnificent.

BUT EVEN MORE BEAUTIFUL IS THE CLASSIC PHENOMENON OF FOG THAT WE ADMIRE AT DAWN

Leaving the tent we can see the Sibillini Mountains rising from the white mist that covers the plain making them similar to islands. It is something ethereal that gives them a mysterious but light aspect: the fog floats under the slopes of the mountains as if it wanted to caress them when we wake up.

Sibillini Mountains, a place of wonders and mysteries, legends and magic. We have been lucky enough to admire them in all their splendour, on a journey of sustainability and respect for the environment, walking or riding an electric bike and using sustainable and plastic-free equipment, from water bottles to solar panels to charge our devices, and spending the night in a tent in complete connection with nature. Now it's time to go, but we'll be back soon to talk about the next trip of our project Explore Local, Protect Global. The borders gradually open up, as so does the desire to explore our wonderful country.

MAGMA

MAGMA IS DESIGNED TO HIKE, RUN AND SCRAMBLE IN ALL TYPES OF TECHNICAL MOUNTAIN TERRAIN. IT DELIVERS A NEW LEVEL OF GRIP AND PROTECTION IN A LIGHTWEIGHT, COMFORTABLE SHOE.

- PERFECT INDIVIDUAL FIT
- ALL TERRAIN GRIP AND PROTECTION
- DOWNHILL PERFORMANCE AND SHOCK ABSORPTION

CAS

CUSTOM ADAPTIVE SHAPE

15

CUSTOMIZED
IN 15 MINUTES

PERFECT INDIVIDUAL FIT

GREAT FIT OUT OF THE BOX ANATOMICAL LAST

Hiking and running in harsh and variable terrains requires a superior level of comfort and secure foot hold. Magma upper and footbed are pre-shaped around a specific anatomical last to deliver a great feel and perfect fit, right out of the box.

This anatomical fit also provides greater midfoot support and heel hold.

NO BREAK-IN TIME CUSTOM ADAPTIVE SHAPE

No two feet are alike. For this reason, we believe that shoes should be able to adapt to the unique shape of each person's feet.

The option to customize our shoes makes it possible to dramatically reduce the time normally needed to break in a new pair of shoes. This also solves the majority of problems related to comfort, blistering and lack of precision.

MIDFOOT SUPPORT PRE-MOLDED EVA FOOTBEDS

When muscles get tired during a long traverse or downhill section on rocky terrain, it's crucial to have a shoe capable of supporting the midfoot to prevent ankle injuries.

Unlike our other C.A.S. shoes, the Tecnica Magma is offered with a pre-molded, cushioned EVA footbed that delivers a great, instant fit without requiring customization.

TECHNICAL FEATURES

MICRO ADJUSTMENT INTEGRATED LACING SYSTEM

Highly durable yet lightweight construction with a classic tongue design for a faster step-in, combined with an integrated lacing system for improved fit precision.

PROTECTION AND DURABILITY XO-SHIELD SOLE

Our new sole is developed with the innovative Vibram® Litebase™ technology and Megagrip™ compound rubber. It wraps the upper in critical abrasion zones, providing grip, traction and durability not just underfoot, but also on the toe and sides – all without additional weight or bulk – and with no need for a conventional glued rubber rand.

FAST TRANSITION ROUNDED TOE DESIGN

The last, midsole toe rocker and unique rounded toe shape have been carefully designed to enhance the Magma's responsiveness, grip, fast acceleration and transition in technical terrains.

ALL-TERRAIN GRIP

VIBRAM® LITEBASE™ MEGAGRIP™ SOLE

The unique multi-traction outsole tread pattern, inspired by MTB enduro tire designs, made with Vibram® Litebase™ technology and Megagrip™ compound rubber, offers optimal grip on all surfaces and in both dry and wet conditions.

SHOCK ABSORPTION

HIGH REBOUND EVA MIDSOLE

High rebound compression molded EVA midsole to absorb heavy impact on descents, ESS shank to control torsion and rock plate to protect the forefoot against rough terrain. The 8 mm drop delivers excellent trail running performances.

DOWNHILL PERFORMANCE

OVERSIZE HEEL

The ultra-large heel shape provides great stability when hiking or running downhill and on technical traverses.

Two rubber stability fins on each side of the back of the shoe provide an unparalleled level of braking on technical descents, including on scree, gravel or loose rocks.

TECHNICAL FEATURES

PROTECTION AND ANKLE SUPPORT

The mid cut height collar adds ankle protection and support for safer hiking in technical terrains. It also increases water protection.

WATERPROOFNESS AND BREATHABILITY

Gore-Tex®

Premium upper materials offer water repellency and durability.

Gore-Tex® liners provide the ultimate combination of waterproofness and breathability.

PERFECT INDIVIDUAL FIT

GREAT FIT OUT OF THE BOX

ANATOMICAL LAST

Benefitting from the evolution of the Forge anatomical last, Plasma features the same great out-of-the-box fit with a full, anatomical arch and heel shape.

NO BREAK-IN TIME

CUSTOM ADAPTIVE SHAPE

The first heat-customizable mid-cut shoe in the industry, which offers a high level of foot-hold, support and comfort.

- Customizable heel pocket for perfect heel hold.
- Customizable arch matches the customizable footbed for ultimate arch support.
- Customizable ankle pads adjust the size and positioning of the malleolar pads to accommodate the wide range of customer needs.

CUSTOM ADAPTIVE SHAPE

CAS

CUSTOM ADAPTIVE SHAPE

MIDFOOT SUPPORT

C.A.S. FOOTBEDS

The first high-end, customizable footbed built specifically to match the unique last of our shoes.

- Fully customizable arch and heel cup for natural support and foot-hold. Shaped on the individual's anatomy.
- Customizable EVA layer on the forefoot and heel shock areas offers comfort and cushioning.
- Perforated breathable zones.

ALL TERRAIN GRIP AND PROTECTION

THE OVERLAP DESIGN

Inspired from ski boot design, we created a unique construction that allows us to attain the maximum comfort and performance from our anatomical last and customization features.

SELF LOCKING LACE DESIGN

We designed an innovative lacing solution that matches our anatomical fit.

FLEXIBLE CONSTRUCTION

- Strobel upper construction with externally lasted EVA midsole for maximum cushioning and comfort.
- Dual density EVA midsole with TPU shank offers cushioning, comfort and arch support.
- Deconstructed upper design results in comfort and flexibility with a high level of support due to the C.A.S. upper and footbed.

TRACTION OUTSOLE

- Trail running inspired forefoot design for a high level of traction on muddy or rolling terrain.
- Block-shaped lugs in the perimeter and heel for great stability.
- Climbing zone and Vibram® Megagrip™ compound optimal for light scrambling and via ferrata. Grippy on wet and slippery terrain.

PROTECTION

FROM VARIABLE CONDITIONS

The use of premium nubuck leather on the Plasma and the uniquely developed stretch treated fabric on the Plasma S, offers water repellency and durability.

Gore-Tex® liners provide the ultimate combination of waterproofness and breathability to ensure our shoes are both durable and comfortable anytime, everywhere.

PERFECT INDIVIDUAL FIT

GREAT FIT OUT OF THE BOX

ANATOMICAL LAST

We wanted to create a new, out-of-the box fit experience that is both comfortable and precise. We achieved this goal by designing a unique last, which is a true mirror of the foot.

With its fully anatomical shape, the Forge last delivers unparalleled fit and allows Tecnica to pre-shape the shoe with anatomical precision.

NO BREAK-IN TIME

CUSTOM ADAPTIVE SHAPE

The first heat-customizable upper in the outdoor industry, which offers a high level of foot-hold, support and comfort.

CAS

CUSTOM ADAPTIVE SHAPE

CAS

CUSTOM ADAPTIVE SHAPE

MIDFOOT SUPPORT

C.A.S. FOOTBEDS

The first high-end, customizable footbed built specifically to match the unique last of our boots. All the benefits of a customized arch support without the disadvantages (trimming and changing the foot positioning) of expensive after-market solutions.

ALL TERRAIN GRIP AND PROTECTION

THE OVERLAP DESIGN

Inspired from ski boot design, we created a unique construction that allows us to attain the maximum comfort and performance from our anatomical last and customization features.

SELF LOCKING LACE DESIGN

We designed an innovative lacing solution that matches our anatomic fit.

ADAPTIVE UPPER MATERIALS

- High-level of adaptability during customization.
- High-level of flexibility and comfort while walking.

ADAPTIVE SOLE DESIGN

- Lower midsole layer: soft density EVA allows the deformation of the lugs to adapt to different terrains.
- Central layer: hard ESS EVA protects the foot from hard, edgy rocks.
- Upper layer: mid density EVA is light, flexible and cushioned to deliver the maximum level of comfort.
- Vibram® Megagrip™ compound delivers the ultimate level of grip and durability on all surfaces and terrains.

PROTECTION FROM VARIABLE CONDITIONS

The use of premium nubuck leather on the Forge offers water repellency and durability.

Gore-Tex® liners provide the ultimate combination of waterproofness and breathability to ensure our shoes are both durable and comfortable anytime, everywhere.
