TECNICA TECHNOLOGIES

THE MOST VERSATILE HIGH-PERFORMANCE SKIBOOT JUST BECAME STRONGER AND LIGHTER

NEW TECNICA COCHISE

T.RIDE

HIGH PERFORMANCE WALKING SYSTEM

The T-Ride system is fully integrated into the boot design. It's a solid cuff-to-shell connection which delivers the perfect combination between downhill performance and uphill hiking ability.

DRIVE PRECISION

The T-Ride longer lever arm guarantees a quicker edge to edge transition, increased lateral power and stability.

INTUITIVE SAFETY

The way the T-Ride is designed makes it easy and intuitive, you will always be sure whether is on ski or hiking mode.

The integrated lock system screw ensures that the mechanism stays closed even during hard cliff landings or impact with rocks.

The 50 degrees range of motion allows a comfortable hike up to the summit when in walk mode.

C.A.S. – PERFECT INDIVIDUAL FIT

THE C.A.S. FIT SYSTEM GIVES YOU THE ABILITY TO TRULY CUSTOMIZE YOUR SKIBOOT FOR AN ABSOLUTE PERSONAL FIT. THE ANATOMICAL SHAPE OF THE LINER AND SHELL ARE THE KEY TO A GREAT OUT-OF-THE-BOX FIT. THE CLOSER THE LINER AND SHELL MATCH THE NATURAL SHAPE OF THE FOOT, THE BETTER THE FIT AND PERFORMANCE WILL BE.

C.A.S. LINER

The Cochise C.A.S. liners are light, anatomically shaped for optimal comfort and great heel hold. The dual density micro-cells material is durable and easy to customize. For unmatched personal customization the C.A.S. liner can be thermo-molded, punched and grinded. The new folding structure on the back ensures easy hiking.

COCHISE 130 DYN GW

COCHISE 120 DYN GW
COCHISE 110 DYN GW

C.A.S SHELL

The C.A.S. shell has an anatomical shape that matches the foot shape. This allows for a better out-of-the-box fit. The dimples on the shell reduce surface tension and facilitate the thermo customization process, making boot fitters' life easier. The shell materials allow better and longer retainment of the customized shape.

C.A.S. TONGUE

A great addition to the C.A.S. customization system. The C.A.S. Tongue can be thermoformed in a few minutes to perfectly match the shape of your shin.

- 3D custom shape of the tongue
- Solves the problem of shin pain
- Increases the performance
- Easy to thermoform

TECHNICAL FEATURES

ARCH GRIP

Toe and heel Vibram® rubbered soles are connected by the rubber Arch Grip that delivers more versatility in the daily usage. It supplies more grip on mountain terrain, on metal ladders, on snowmobiles, and so on.

FREE MOVE

The new hinge point allows frictionless hiking, so you can hike more with less energy.

QUICK INSTEP

The instep material is softer, making stepping in and out easy and avoiding unnecessary pain, especially at low temperatures.

ASYMMETRIC POWER TRANSMISSION

The inside of the boot is made with thicker plastic to increase support where needed. This provides more lateral power transmission and increased edge grip.

POWER LOCK

The Power Lock strap provides perfect control and more precise power transmission. The hook eliminates the need to open the strap completely, saving you time.

PERFORMANCE EFFICIENCY

NEW TECNICA MACH1 LV

M
MACH 1

T.DRIVE

A TRUE GAME CHANGER
TECHNOLOGY TO
IMPROVE PERFORMANCE
AND COMFORT THANKS
TO A REVOLUTIONARY
NEW SHELL TO CUFF
CONNECTION.

TECHNICAL FEATURES

DRIVE PRECISION

The T-Drive dynamic carbon connector creates a longer lever arm compared to traditional ski boots. This allows:

- Quicker edge to edge transition
- Increased lateral power and stability
- Edge drive precision

PERFORMANCE EFFICIENCY

The T-Drive technology creates a stronger and more effective connection between the cuff and the shell, that delivers a more consistent flex and reduces plastic deformation. This means that the boots perform better with less effort. They do the work for you so you can ski longer and better.

10%

Faster than the other boots

25%

Increasing of the lateral power

20%

Increasing of the edge stability

10%

Less material deformation

FLEX

Different flex (more progressive)

COMFORT

Bootfitting is not affected

ENHANCED COMFORT

The T-Drive technology provides a constant flex regardless of temperatures, which reduces shell deformation and delivers a more consistent fit.

And since the support comes from the T-Drive, the material of the shell and cuff is softer. As a result, the boots wrap better and are easier to get on and off, without compromising the performance.

LV

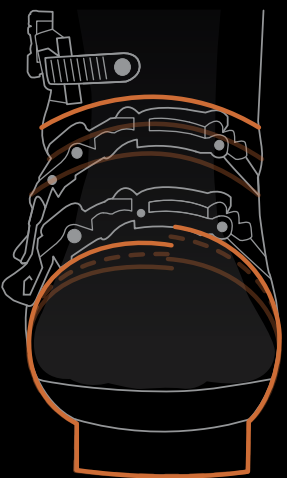

Low volume

MV

Mid volume

HV

High volume

VOLUME STORY

Best fit out-of-the-box. Precise anatomical shape results in an accurate fit that offers more comfort and better performance.

To guarantee the perfect fit matching every foot-shape the Mach1 series is offered in 3 different volumes:

- Low volume: 98 mm
- Mid volume: 100 mm
- High volume: 103 mm

C.A.S. LINER

The C.A.S. liners are anatomically shaped for optimal comfort and great heel hold.

The dual density micro-cells material is durable and easy to customize.

For unmatched personal customization the C.A.S. liner can be thermo-molded, punched and grinded.

C.A.S SHELL

The C.A.S shell has an anatomical shape that matches the foot shape. This allows for a better out-of-the-box fit. The dimples on the shell reduce surface tension and facilitate the thermo customization process, making boot fitters' life easier. The shell materials allow better and longer retainment of the customized shape.
